 - c. Halal in Islam & the Cultural Practice

UNIVERSITI MALAYA

**INTERNATIONAL
INDIGENOUS
MOBILITY
PROGRAMME
@ UM**

Program Overview

The notions of *indigeneity* and modernity has been an ongoing scholarly discourse, and *Indigenous people* has been cast as the ideal types representing a phenomenon of traditional fading into certain transformations. These transformations sometimes brought crisis in their culture, identity, practices and belief. Despite all these challenges, *Indigenous communities* in Malaysia still hold their tradition and cultural practices with certain level of outside influence to adapt as a strategy for continuation. This 3-week programme attempts to expose students to experience the contentment of Indigenous people especially Indigenous youth in learning, retaining and adapting their tradition.

Learning Outcomes

- To enrich global mindset through *cross-cultural learning* and experience with *different Indigenous communities*
- To enhance *critical thinking* and finding *solutions* to community challenges and struggles
- To develop *creativity* through the participations in Indigenous cultural activities

BACHOK MARINE RESEARCH STATION

Bachok Marine Research Station is a Universiti Malaysia research station that is located on the east of Malaysia, facing the South China Sea. It is located near several beautiful islands that are rich with marine life. The area can be explored through exciting recreational activities including hiking, snorkeling, and scuba-driving.

PUTRA SCIENCE PARK

Putra Science Park (PSP) is the center for UPM innovation management or technology transfer office (TTO) for Universiti Putra Malaysia that supports technology transfer activities in UPM by moving the potential technologies and research from the laboratory to the market.

SEATRU RESEARCH STATION

SEATRU is the Sea Turtle Research Unit of Universiti Malaysia Terengganu. Sea turtle research at UMT has since developed into a multi-disciplinary program aimed at studying all aspects of the biology and ecology of sea turtles, threats to their survival, and how they can be managed in order to restore the various species to a stable population level.

Basic Malay Language Course

About The Program

The course provides lessons to international students to master elementary Malay. The course encompasses the four skills of speaking, listening, reading and writing necessary for general communication in Malay. Emphasis will be given to oral and writing exercises.
